

PROFESSIONAL PROFILE

A cross-disciplinary Senior UX/UI & Product Designer with over two decades spanning product design, VFX, motion graphics, brand identity, and front-end development. Known for bridging design craft and engineering — from research and wireframes through to production-ready interactive code.

"Design is not just how it looks — it's how it moves, how it feels, and fundamentally how it solves the right problem for the right person."

CORE COMPETENCIES

- End-to-End UX: Research, empathy mapping, wireframes, hi-fi prototyping & WCAG accessibility.
- iGaming UI: 6 years delivering slot UI systems — reel frames, win screens & animation direction.
- Motion & VFX: Animation direction, motion graphics & visual effects across broadcast and gaming.
- Brand Identity: Logo systems, design tokens & brand governance across multiple industries.
- Front-End Dev: HTML5, CSS3, JavaScript & Canvas API — ships interactive browser prototypes.
- AI Workflows: Integrated AI tooling for ideation, annotation & design-to-dev handoff.

SELECTED WORK

iGaming UI — Wonderlabz · Playsafe · Pantelotteriet

End-to-end UI design and animation direction across 6 years of slot game production — reel frames, win screens, sticky wilds, and brand UI systems across three major portfolios at Astria Systems.

UX Design Institute Diploma — Dublin

Professional Diploma in UX Design (2023–2024) covering user research, interaction design, information architecture, and usability testing to international standards.

Brand Identity & Motion Direction

20+ years of logo design, brand systems, motion graphics and VFX spanning broadcast, gaming, and digital product environments across South Africa and internationally.

TECHNICAL TOOLKIT

Figma

HTML5 / CSS3

JavaScript

Adobe Creative Suite
