1 Brand Elements

The background of the slide is a vibrant, abstract pattern made of overlapping diamond shapes. The colors transition from deep blues and purples on the left to bright pinks and oranges on the right, with shades of green and yellow at the bottom. The overall effect is a modern, geometric aesthetic.

The Logo

Wonderlabz

Name, corporate logo, colours, typeface - these are the pillars of the identity of the company. Their characteristics ensure an individual and consistent image of the company on the market.

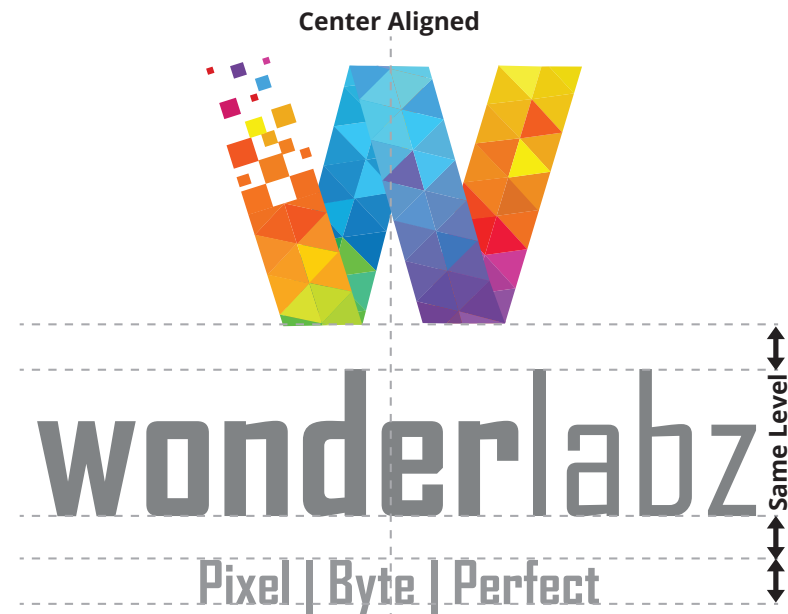

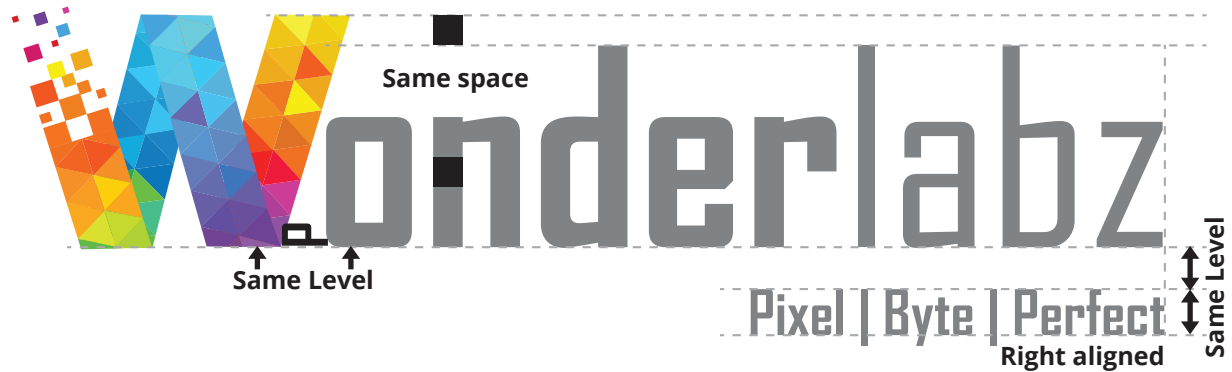

Chapter 2 of this brandbook shows all the rules for Wonderlabz Logo

The Logo

Wonderlabz spacing

The spacing between logos and elements need to adhere these rules.

Chapter 2 of this brandbook shows all the rules for Wonderlabz Logo

Brand Graphics

Normal Photos

Photography is crucial part of the our brand identity.

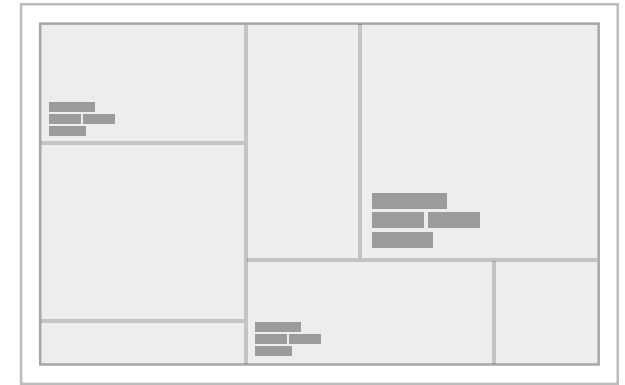

Brand Graphics

Photo grids

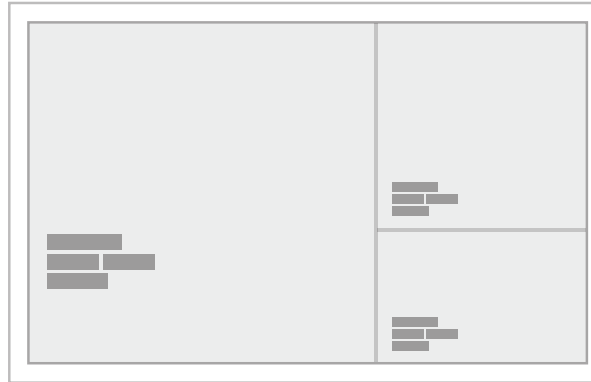

Creating image collages/compositions in a consistent way improves brand perception. These are just a few examples of grids that can be used in Wonderlabz materials.

✓ Full screen/page pictures

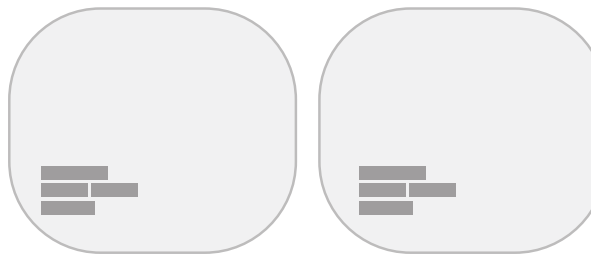

✓ Irregular grids are highly recommended, spaces between the photos are not required.

✓ Small Irregular grids

✓ ✗ Regular grid - try to avoid using regular grids in printed materials. If used - use with blank spaces between. For digital usage it's accepted.

✗ Don't use different than rectangle/square shapes for photos.

✗ Don't use different photo description style in one document, and try to keep consistency throughout the documents.

Brand Graphics

Placing logos on pictures

If the logos are placed on the pictures as a secondary element (not part of the main graphic theme, such as watermarks), use the right lower corner as a primary logo placement area.

If the image doesn't allow the logo to be legible in the right lower corner, place it in other corners respecting the safe areas.

This applies to all logo types.

2 Logos

Logo Chart

Logo positioning

Wonderlabz has a few logos usages.

They are divided into 3 main groups.

Corporate stand-alone logo

Events Logo position

Partners / Suppliers logo position

Logo Do's and Dont's

DO's and DONT'S for logo use

✓ Always use logo files from the Brand Guidelines respective folders. Never try to recreate them from the guidelines.

✗ Never stray from the color palette

✗ Never switch the colors

✗ Never rearrange elements of the design

✗ Never stretch or distort the Logo

✗ Never change or alter any fonts.

✗ Never change the orientation of the logo with angles different than 0° or 90°

Corporate logo

Main Logo

The Wonderlabz colour pallet is a comprised of specific colours chosen from the logo;

Pantone 115C
CMYK: 1,11,93,0
RGB: 255,218,39
#ffda27

Pantone 1655C
CMYK: 0,84,100,0
RGB: 255,78,0

RGB: 96,187,70
#60bb46

Pantone Cool Grey 8 C
CMYK: 52,42,41,6
RGB: 129,132,134
#818486

Corporate logo

Minimum Size

The minimum size shows the smallest allowed usage of the logo. This is to prevent the logo or part of it from being illegible, as long as the minimum font size is not smaller than 8 pt.

Corporate logo

Use on different backgrounds

In general - don't use Wonderlabz corporate logos on backgrounds that are different colour schemes than white/light/blue/dark blue.

Proper usage:

1. Acceptable on light - solid, gradient or patterned backgrounds - white/grey.
2. Acceptable on fairly uniform blue/dark backgrounds.
3. Galleries/multiple photos - due to the nature of photos, it's recommended to use the Wonderlabz logo on a small square (to keep consistency within a gallery)

Incorrect use of logos:

1. Don't use logos in a way that makes it eligible - e.g. dark logo on dark background, logo on complicated backgrounds.

Logo integration

Partner / Supplier

The version of the corporate logo with the integration of the partner logo.

PARTNER
SUPPLIER
LOGO

Partner/Supplier

Construction rules

This logo is constructed by placing Wonderlabz corporate logo on the left, and the partner logo on the right with a separator line between. Separator is slightly bigger in height than the Wonderlabz logo.

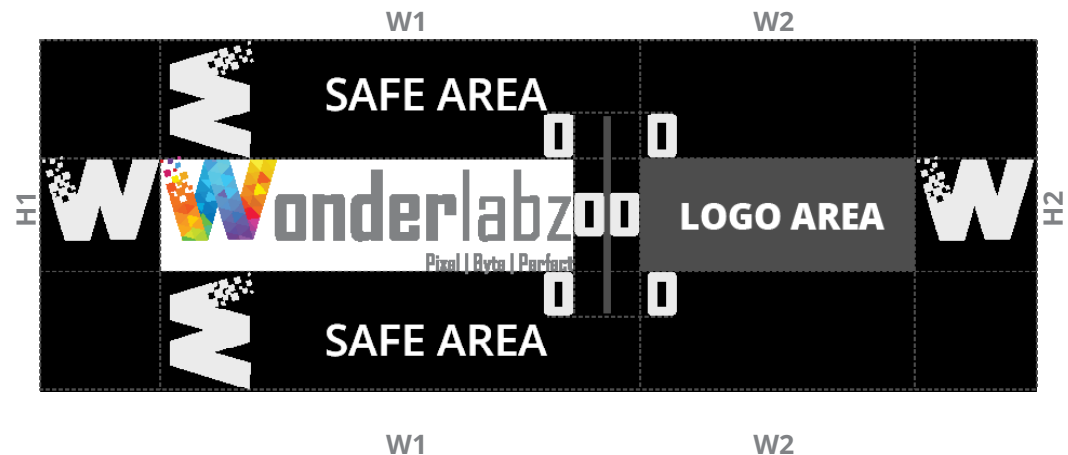

The area for the partner logo is only partly defined, as partner logos can have different proportions. Partner logo can't be higher than Wonderlabz logo, and the area (x*y) can't be larger than Wonderlabz logo.

The safe area is defined as shown in the example, but for Partner/Supplier logo respect the rules for safe area, colours, and placement on a background.

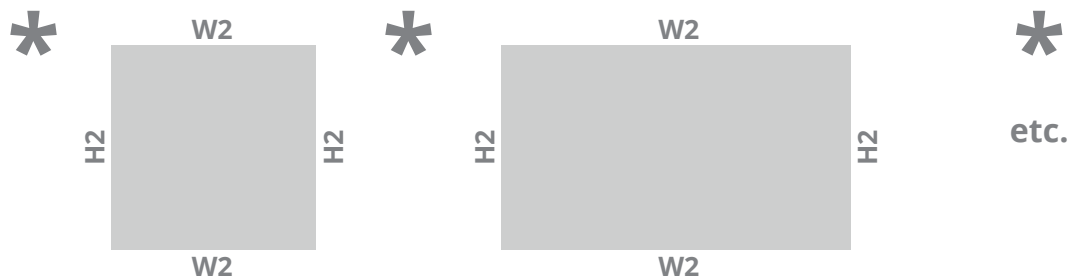

For Wonderlabz logo, please respect the following rules:

- colour rules
- b/w & greyscale versions
- background placement
- minimum sizes

You may refer to Wonderlabz corporate logo rules and the rules of the Partner logo.

Logo can have different proportions, but the surface of the partner logo has to be equal or smaller than Wonderlabz logo.

Partner integration

Construction rules with “Official Partner” tag line

This logo is constructed by placing Wonderlabz corporate logo on the left, and the partner logo on the right with a separator line between. Separator is slightly bigger in height than the Wonderlabz logo.

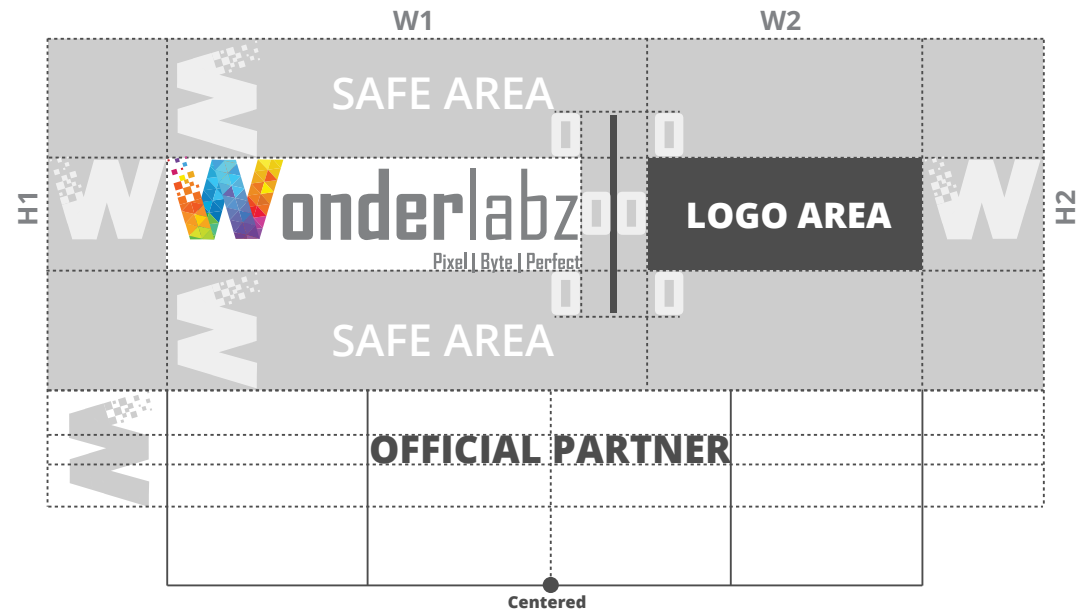

The area for the partner logo is only partly defined, as partner logos can have different proportions. Partner logo can't be higher than Wonderlabz logo, and the area (x*y) can't be larger than Wonderlabz logo.

The safe area is defined as shown in the example, but for Partner/Supplier logo respect the rules for safe area, colours, and placement on a background.

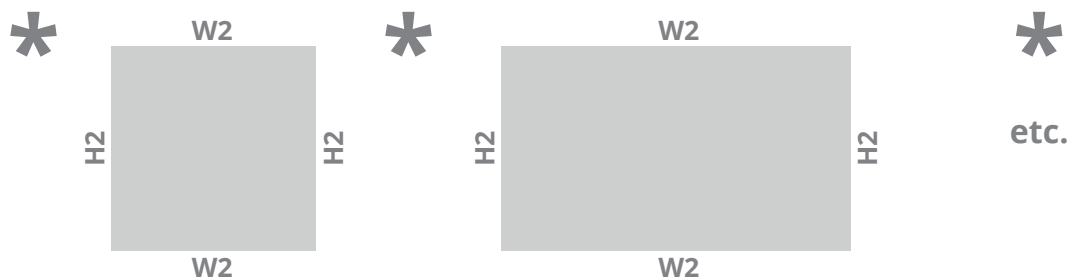

For Wonderlabz,
please respect the following rules:

- colour rules
- b/w & greyscale versions
- background placement
- minimum sizes

You may refer to Wonderlabz corporate logo rules and the rules of the Partner logo.

Logo can have different proportions,
but the surface of the partner logo has
to be equal or smaller than Wonderlabz logo.

Email Signature Integration

How to create your Wonderlabs signature G-mail

Follow Instructions to create your mail signature.

Preparing your Wonderlabz Email signature

Name Surname
Position

Contact: +55 55 555 555
Skype: Lorem Ipsum Dolor
Email: person@wonderlabz.com

Important

The reason for scaling down a larger image to a smaller size is to prevent the logo from pixelating. Some mail clients scale mail signatures up or down depending on the screen resolution. (This does not have to be done on all mail clients)

Clear Logo (Correct logo insertion)

Blurry Logo (Incorrect logo insertion)

Signature in G-mail

Press the Settings gear on the top right-hand side of the page.

Then press the [See all settings](#) that appears in the same space. Scroll down to the signature settings and press [+ Create new](#). Name the signature "Wonderlabz Signature" copy-paste the selection from the provided signature document and replace the copy with your personal information. Then press the button and select the signature Logo provided. (Choose -Medium- by the sizing Section). Then deselect the (Insert signature before quoted text in replies and remove the "--" line that precedes it.) checkbox at the bottom of the Signature options.

Then Scroll to the bottom of you page and select [Save Changes](#) your signature is now finished.

Remember to select the insert signature button to ad your Signature to your mail.

Email Signature Integration

How to create your Wonderlabs signature Mac Mail

Follow Instructions to create your mail signature.

Preparing your Wonderlabz Email signature

Name Surname
Position

Clear Logo (Correct logo insertion)

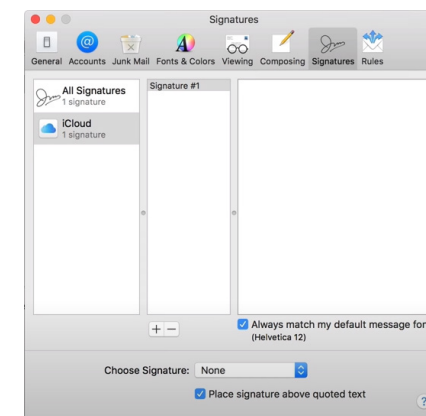

Blurry Logo (Incorrect logo insertion)

Signature in Mac Mail

Open your mac Mail application. Then go to the "mail" drop-down and click "Preferences". Your Signature creation application will the open as seen below.

Then click on the "+" button at the bottom of the middle column. Clear the default message that appears in the right column. Then open the provided (Signature.pages) file provided in the Pages application and copy all the information. Paste this information into the Signature section **making sure the (match default font) tick box is deselected below the signature space of Mac Mail.** Please note that the text formatting will not look perfect (that's ok) just replace the dummy text with your information not moving anything around keep formatting exactly as it is. Then drag and drop your newly created signature from the middle column to your mail provider in the right column. Then close the window and test the signature.
