

JONATHAN

NESTLER.

SENIOR CREATIVE DESIGNER · APPLICATION — BRANDTECH+

June 2026

Dear Hiring Team,

Twenty years ago I started my career turning complexity into clarity, briefs into experiences, and ideas into things that actually moved people. I am still doing exactly that. The only thing that has changed is **the tools have finally caught up with the ambition.**

I am a Senior Creative Designer and UX/UI Product Designer with over two decades of experience spanning product design, visual effects, motion graphics, brand identity, and front-end development. Currently **Jr. Product Owner at Astria Systems**, I lead design across three active product portfolios while integrating **Claude AI, Figma AI, and Midjourney** into my daily workflows — not as novelty, as craft.

Brandtech+'s position on GenAI in the creative industries is one I share without reservation. The designers who will navigate the opportunity and the ethics well are the ones already doing it, learning from it, and forming genuine opinions. I am one of those designers.

My portfolio has a dedicated AI workflow section — from **prompt-driven UX copy and component specs inside Figma**, to rapid visual ideation that collapses days of research into focused hours of creative direction. This is not a future skill. It is my current practice every day.

What I bring beyond the tools is **range**. Shipped iGaming UI systems. Directed broadcast motion campaigns. Redesigned enterprise websites from research to pixel-perfect delivery. Built design systems across multiple live brands. Written HTML, CSS, and JavaScript to bring prototypes to life in the browser. I design to an outcome, not a handoff.

BE AMBITIOUS

BE IMAGINATIVE

BE INSPIRATIONAL

ALWAYS LEARNING

RESULTS-FOCUSED

PRO-INCLUSIVE

I read your values and recognised the way I already work.

Warm regards,

JONATHAN EDWARD NESTLER
