APPLICATION — UI/UX DESIGNER · PAINTBHARAT CO.

June 2026

Hi PaintBharat Co. team,

You asked for someone who loves turning complex problems into simple, beautiful solutions. **Twenty years in, that description still gets me out of bed in the morning.**

"Designs don't just look good — they create real impact." That is not just your tagline. It is how I have worked for two decades.

I am a Senior UI/UX and Product Designer currently serving as **Jr. Product Owner at Astria Systems**, where I lead UX/UI design across three active product portfolios — designing in Figma every day, building reusable component systems, and directing product direction in close collaboration with engineering. Before that, five years as Product Designer at Wonderlabz SA delivering end-to-end UI/UX, corporate identity, and motion across multiple brands.

My toolkit goes beyond aesthetics. I bring **end-to-end UX process** — user research, empathy mapping, journey mapping, wireframing, hi-fidelity prototyping, usability testing, and WCAG AA accessibility — alongside active **AI-integrated workflows** using Claude AI, Figma AI, and Midjourney to move faster without losing craft. I also write HTML5, CSS3, and JavaScript, which means my designs come with a built-in understanding of what engineering can actually build.

My portfolio has live case studies, motion work, and an interactive UX process — not just pretty screens.

- FIGMA
- UI/UX DESIGN
- DESIGN SYSTEMS
- PROTOTYPING
- USER RESEARCH
- CLAUDE AI
- FIGMA AI
- HTML5/CSS3/JS
- AFTER EFFECTS
- WCAG AA
- MOTION GRAPHICS
- 20+ YEARS

Resume attached. Portfolio live at the link above. Would love to talk.

Warm regards,

Jonathan Edward Nestler
