

JONATHAN

NESTLER.

SENIOR CREATIVE DESIGNER · APPLICATION — BRANDTECH+

June 2026

Dear Hiring Team,

Twenty years ago I started my career turning complexity into clarity, briefs into experiences, and ideas into things that actually moved people. I am still doing exactly that. The only thing that has changed is **the tools have finally caught up with the ambition.**

I am a Senior Creative Designer and UX/UI Product Designer with over two decades of experience spanning product design, visual effects, motion graphics, brand identity, and front-end development. Currently **Jr. Product Owner at Astria Systems**, I lead design across three active product portfolios while integrating **Claude AI, Figma AI, and Midjourney** into my daily workflows — not as novelty, as craft.

Brandtech+'s position on GenAI in the creative industries is one I share without reservation. The designers who will navigate the opportunity and the ethics well are the ones already doing it, learning from it, and forming genuine opinions. I am one of those designers.

Here is exactly how I use GenAI in my practice today:

CLAUDE AI + FIGMA Prompt-driven UX copy, design rationale, component specs, and dev-ready annotation — generated inside active Figma workflows at Astria Systems. Replaces manual documentation with live, accurate handoff.	MIDJOURNEY + DALL-E Rapid mood boarding, art direction references, and visual concept generation. Collapses days of research into hours — used at the brief stage to align stakeholders before a pixel is designed.
FIGMA AI FEATURES Auto-layout inference, component scanning, and design system consistency checks across large libraries. Catches drift and surfaces consolidation opportunities without manual audits.	AI-ASSISTED PROTOTYPING Micro-interaction scripting, edge-case scenario generation, and annotated handoff — shortening the gap between design intent and final build without losing craft or control.

What I bring beyond the tools is **range**. Shipped iGaming UI systems. Directed broadcast motion. Built design systems across multiple live brands. Written HTML, CSS, and JavaScript to bring prototypes to life in the browser. I design to an outcome, not a handoff.

- BE AMBITIOUS
- BE IMAGINATIVE
- BE INSPIRATIONAL
- ALWAYS LEARNING
- RESULTS-FOCUSED
- PRO-INCLUSIVE

I read your values and recognised the way I already work.

Warm regards,

JONATHAN EDWARD NESTLER
